

Second Circular

This is the second announcement of the Asian Nuclear Physics Association (ANPhA) symposium on nuclear physics facilities in Asia (ANPhA2018) which will be held in Beijing, China on September 13, 2018. This symposium will come together with the routing annual ANPhA board meeting, this year in Beijing. The ANPhA board meeting and facility tour will be held on September 14. The symposium is supported by National Nature Science Foundation of China, Asia-Pacific Center for Theoretical Physics, China Center of Advanced Science and Technology, China National Nuclear Corporation and China Institute of Atomic Energy.

As you may know, the main objectives of ANPhA are to strengthen collaboration among Asian nuclear research scientists, to promote education in Asian nuclear science, to encourage coordination among Asian nuclear scientists by utilizing existing research facilities, and to discuss future planning of facilities and instrumentation for nuclear science in Asia. To achieve these goals, ANPhA organizes an international symposium almost every year since 2009 when ANPhA was first launched in Beijing.
